## **Engate Receives Internet Telephony Magazine's "Product of the Year" Award for Network Profiling Connection Management Technology**

***Engate's Threat Preemption Technology Empowers Anti-Spam Software, Security Appliance, Router, Firewall and UTM Vendors to Differentiate with 99.97% Accuracy***

**San Jose, CA – January 23, 2007** — Engate Technology Corporation, a leading supplier of next generation network profiling connection management security solutions, today announced that the editors of Technology Marketing Corporation's INTERNET TELEPHONY® magazine have named Engate's threat preemption solution as a recipient of the 2006 Product of the Year Award. The award was given in recognition of Engate's innovation in helping anti-spam software vendors, hardware vendors, service providers, and enterprises preemptively stop malicious threats such as image spam, phish, and zombies at the connection level -- prior to transmission. Engate's Network Profiling Connection Management technology can be extensible to other protocols, such as Instant Messaging and Internet Telephony, delivering the best safeguard for today's and tomorrow's threats.

"Internet Telephony magazine is proud to bestow Engate with a 2006 Product of the Year Award. Each year we recognize companies that have demonstrated excellence in technological advancement," said Rich Tehrani, TMC President and Editor-in-Chief of INTERNET TELEPHONY magazine. "We evaluated hundreds of firms based on strength of technology and company vision, and we're honored to award Engate for their innovation in helping vendor OEMs, service providers and enterprises to successfully stop threats outside the network. I look forward to seeing other innovative solutions from Engate as they continue to augment the future of the anti-spam marketplace."

"We're honored to be selected by *Internet Telephony* magazine as it continues to validate the innovation and value that Engate delivers to OEM vendors, service providers and enterprises worldwide", said Wil Cochran, CEO, Engate. "Engate is impenetrable to threats because its proprietary technology uses source information that cannot be forged, resulting in a permanent solution to these threats. As a first line of defense, Engate MailSentinel™ eliminates over 99 percent of incoming spam at the connection level - saving bandwidth, conserving network resources and yielding the highest level of security in the market."

### **Engate MailSentinel™ -- Differentiate with Proprietary Network Profiling Technology**

The company's flagship product, Engate MailSentinel™, transcends today's reputation and content security solutions by delivering preemptive protocol level protection against all email threats. Unlike today's reputation solutions that require secondary filters to achieve better accuracy rates, Engate delivers unmatched security by thoroughly profiling the entire spamming network, analyzing every IP within the network, establishing efficient rules to block malicious email at the connection level, and permanently stopping threats closer to the source.

While Engate uniquely functions at 99.97% accuracy without capturing, storing or reading email content, Engate MailSentinel™ adds incremental value to content filters and application layer security products by radically reducing the volume of unwanted traffic prior to their receipt at the destination mail systems. Once email is determined to be legitimate, Engate directs legitimate mail to the mail transfer agent, and if desired, filtering for objectionable content. The result is drastically smaller volumes of email that require application layer filtering, as well as a reduced load on the email infrastructure, setting a new benchmark for customer satisfaction. Engate has filed 8 patents on its technology.

## **Availability**

Engate MailSentinel™ is available immediately to service providers and enterprises and can be licensed to anti-spam software, security appliance, router, firewall, and unified threat management vendors. For more information, please contact Engate via email: [info@engate.com](mailto:info@engate.com), telephone: 775.745.7151, or visit the company's website: [www.engate.com](http://www.engate.com).

## **About TMC™**

Technology Marketing Corporation (TMC) publishes four print publications: Customer Interaction Solutions, INTERNET TELEPHONY, SIP Magazine and IMS Magazine. TMCnet, TMC's Web site, is the leading source of news and articles for the communications and technology industries. Ranked in the top 2,600 sites in the world by alexa.com\*, TMCnet serves more than one million unique visitors each month. TMC is also the first publisher to test new products in its own on-site laboratories, TMC Labs. In addition, TMC produces INTERNET TELEPHONY Conference & EXPO, The VoIP Developer Conference, VoIP Demo, IMS Expo and Call Center 2.0 Conference. TMCnet.com publishes more than 15 topical online newsletters. For more information about TMC, visit [www.tmcnet.com](http://www.tmcnet.com). (\*alexa.com is an amazon.com company that ranks Web sites by their traffic levels. Neither alexa.com nor amazon.com is affiliated with TMCnet.)

## **About Engate Technology Corporation**

Engate Technology Corporation, winner of the IT Product of the Year award, delivers next generation network profiling connection management security solutions for service providers and enterprises, and can be licensed to anti-spam software, security appliance, router, firewall, and unified threat management vendors. With a leading vision of the email security boundary market direction, the company's flagship product, Engate MailSentinel™, delivers preemptive SMTP connection level protection against all threats. Engate's proprietary technology operates with or without disk drives, enabling OEMs to integrate threat preemption technology into hardware and software. Engate's Network Profiling Connection Management technology can be extensible to other protocols, such as Instant Messaging and Internet Telephony, delivering the best safeguard for today's and tomorrow's threats. For more information, contact Engate at 775.745.7151, or visit the company's website at [www.engate.com](http://www.engate.com).
